Overview

The At Risk Authorization (ARA) application within Alion Journal Entry and Revenue Adjustment System (AJERAS) allows for the submission, review and approval of ARAs through the web. Users can search and filter through all entries and review their statuses.

The ARA application will accommodate two types of ARAs:

- Authority to Spend Only
- Authority to Spend with Revenue Recognition

Logging In

To begin, the user should navigate their browser to <http://intra-app.alionscience.com/ajeras/>. The initial login page (Figure 1) provides for the submission of user name and password. Once granted access, users may log in using the Alion network credentials.

Figure 1: Login Page

The system will time out after **three hours (3)** of non-use.

Once logged in, the application then displays the main landing page (Figure 2) where the application allows 'My Action List' or 'See All ARAs' selection to show only ARAs which require the user's actions, or all ARAs currently circulating the application, respectively.

Landing Page

Creating New ARA (Non-Early Start) – Program Manager (PM)

Creators may create new ARAs by clicking the 'Create ARA' menu and selecting a Risk Category (Figure 9), also see Glossary for each risk category definitions). Non-Early Start risk categories which include Award Fees, Mod Pending (Incremental funding), Internal Cleared, Mod Pending (Exercise Option Period), Commercial At-Risk, Change in Scope, Fixed Price Mod, and Mod Pending (Not Exercise Option Period) prompts the Org Autocomplete input field, Revenue Recognition selection, and JAMIS/Contract Autocomplete input field (Figure 10).

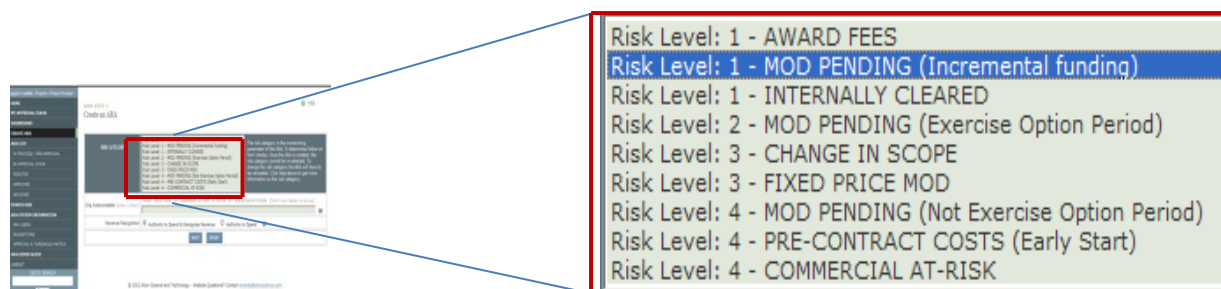

Figure 9: Risk Categories

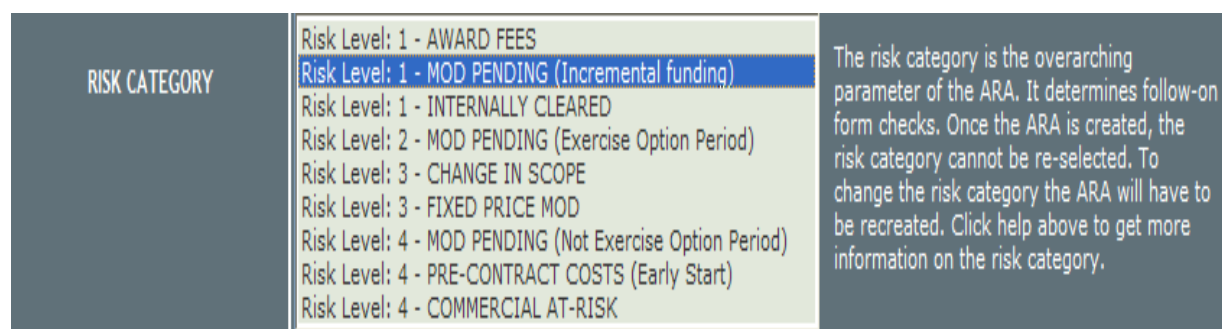

Figure 10: Risk Categories – Non-Early Start ARA

The ARA application prompts the Org Autocomplete input field which pulls up any key strokes matching Sector, Group, Operation, Division, or Description of data stored in JAMIS (Figure 11).

To improve the accuracy of the data, the ARA application checks the validity of data made in these input fields. When you begin to type in a value in a field, the application will display a drop-down window with possible valid values (Figure 11).

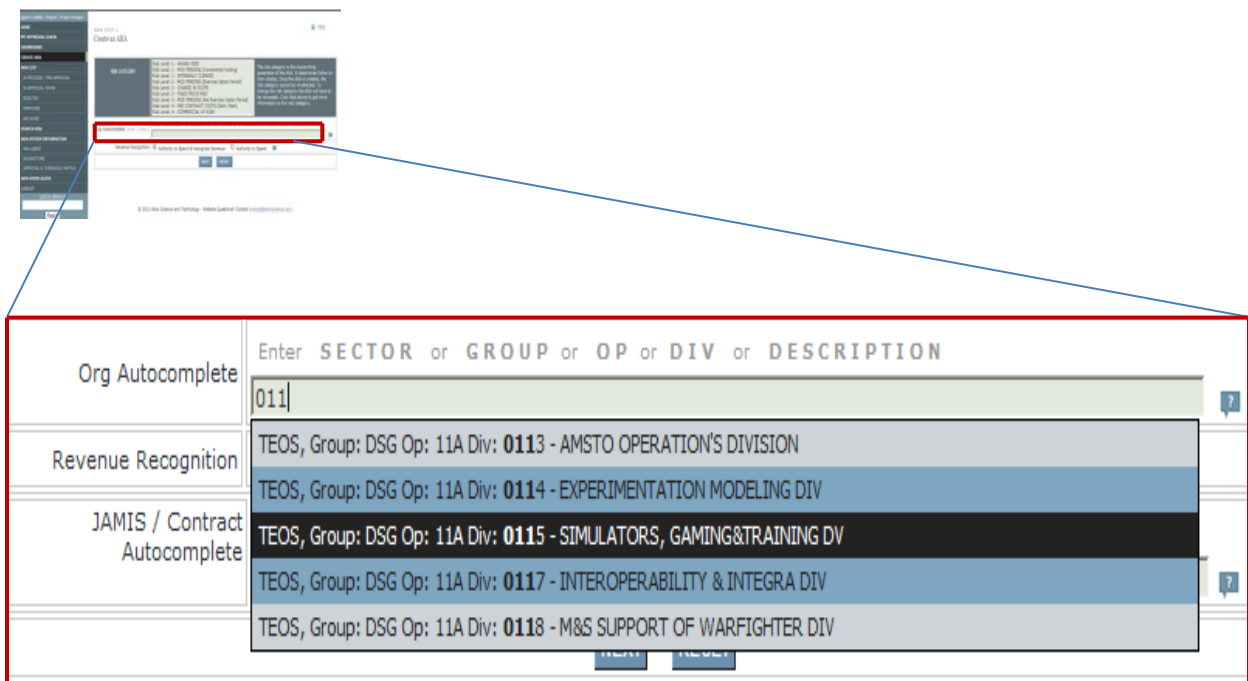

Figure 11: Org Autocomplete Input Field

Once the Org is autocomplete, the user may select the Revenue Recognition (Figure 12) of the ARA to either grant the:

- Authority to Spend and Recognize Revenue, or
- Authority to Spend, only.

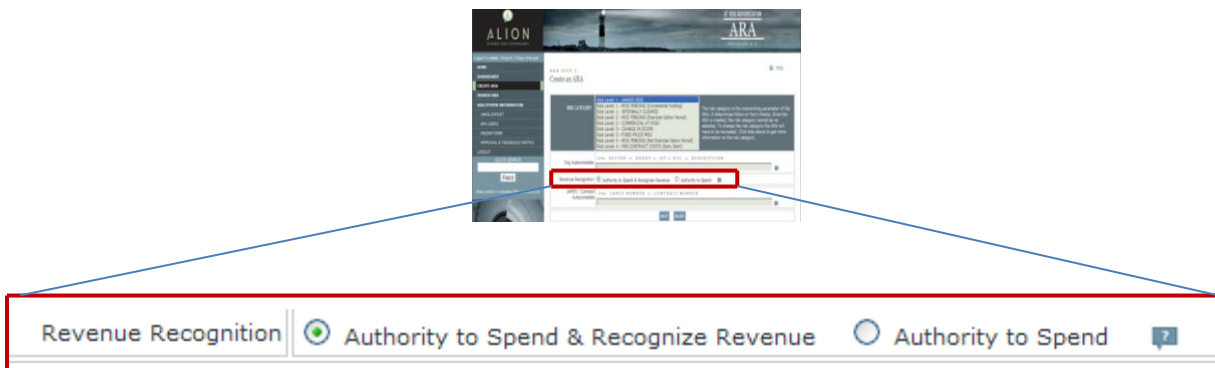

Figure 12: Revenue Recognition Selection

Then, the application prompts the JAMIS/Contract Autocomplete input field which pulls up any key strokes matching JAMIS Number or Contract Number currently stored in JAMIS (Figure 13), before clicking 'Next' to complete the 'Create ARA' page.

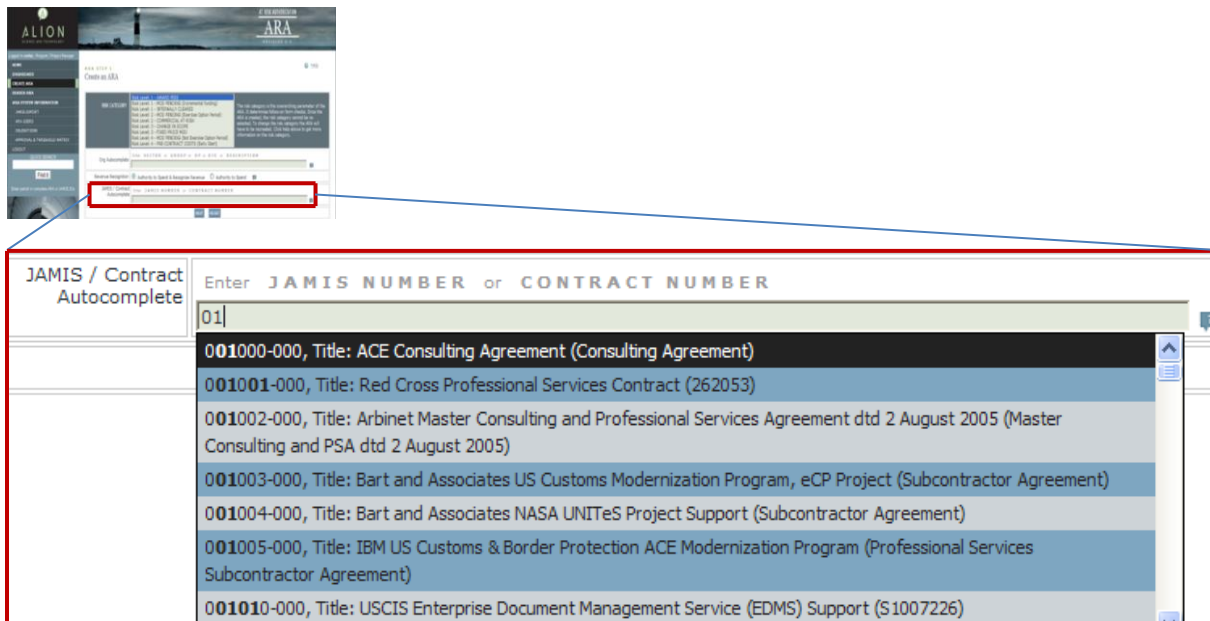

Figure 13: JAMIS/Contract Number Autocomplete Input Field

Once the 'Next' button is clicked, the ARA application will prompt the ARA Creation Step 2 screen detailing the Creator's data inputs. The Creator may select the Contract Manager and Controller from the drop-down menus (Figure 14).

Figure 18: Risk Categories – Early Start ARA

The ARA application prompts the Org Autocomplete input field which pulls up any key strokes matching Sector, Group, Operation, Division, or Description of data stored in JAMIS (Figure 19).

To improve the accuracy of the data, the ARA application checks the validity of data made in these input fields. When you begin to type in a value in a field, the application will display a drop-down window with possible valid values (Figure 19).

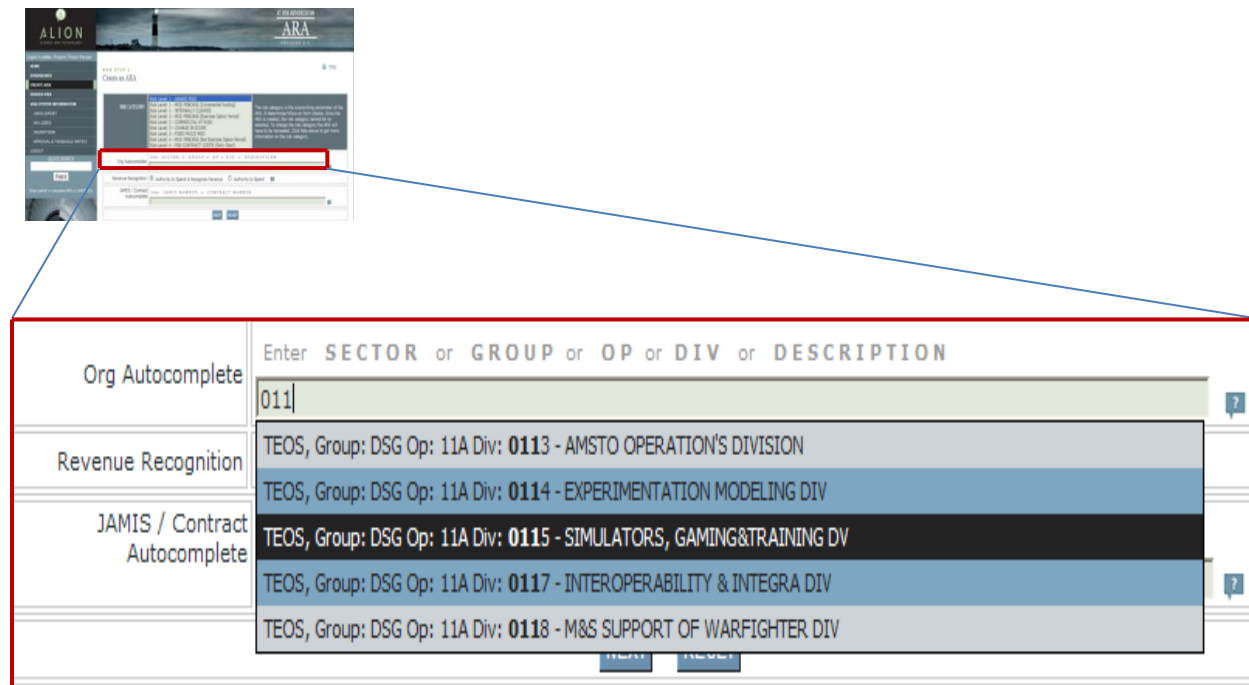

Figure 19: Org Autocomplete Input Field

Once the Org is autocomplete, the user may select the Revenue Recognition (Figure 20) of the ARA to either grant the:

- Authority to Spend and Recognize Revenue, or
- Authority to Spend, only.

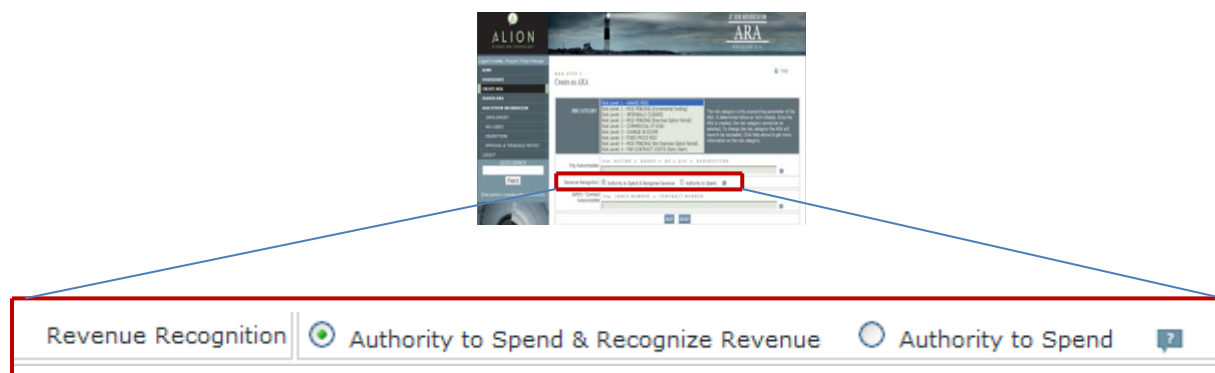

Figure 20: Revenue Recognition Selection

Then, the PM will need to fill out the Opportunities Management System Number (OMS) field which pulls up any key strokes matching data currently stored in the OMS (Figure 21), before clicking 'Next' to complete the 'Create ARA' page.

The screenshot shows the 'Create ARA' page with the 'OMS Number' field highlighted. A red box around the field shows a list of opportunities. The list includes:

- 1001 - FCS Ammo Suite SSEB Support
- 1002 - T-12 Full Mission Trainers/Academic & Simulator Instruction
- 1003 - Sensor Weather Tower
- 1004 - Materials, Process Engineering, Testing and Certification Services for Raytheon Infrared Operations
- 1005 - Smart Catheter FY02
- 1006 - Data Engineering for the Joint Effects Model Program
- 1007 - State of MD Consulting Services Procurement (CSP)
- 1008 - Navy Training Support Contract (TSC) II
- 1009 - NPOES Support to TRW #2

Figure 21: OMS Number Input Field

Once the 'Next' button is clicked, the ARA application will prompt the ARA Creation Step 2 screen detailing the Creator's data inputs. The PM will need to enter the Title and Customer information, as well as select the Contract Administrator and Controller from the drop-down menus (Figure 22).

ARA CREATION STEP 2

Category: PRE-CONTRACT COSTS (Early Start): ARA Number: 00000348

The screenshot shows the 'ARA Creation Step 2' screen. The 'ARA 00000348 Info' section includes:

- Status: Draft
- ARA Revision: 0
- ARA Org: Sector: TEOS, Group: DSG Op: 11A Div: 0115 - SIMULATORS, GAMING&TRAINING DV
- Title: (empty field)
- Customer: (empty field)
- Revenue Recognition: Authority to Spend & Recognize Revenue
- OMS number: 1001 - FCS Ammo Suite SSEB Support

The 'ARA Creators (in same Sector & Group)' section includes:

- Program Manager: Christopher W Velez
- You are the assigned PM for this ARA.
- Contract Administrator: --Select Group / Sector Contract Mgr here --
- Controller: --Select from Group Controllers --
- CREATE ARA button (highlighted with a red circle)

Figure 22: Early Start ARA Creation Step 2 Screen – Contract Administrator & Controller

After the Contract Administrator and Controller are selected, click the 'Create ARA' button (Figure 22) to complete the ARA creation.

Once the ARA is created, the ARA Summary screen will prompt to allow the PM to either:

1. **Save** – To save an ARA to complete later; the application will call up information entered up to this point when the PM is ready to complete this ARA form
2. **Sign and Submit** - To submit an ARA once the required input fields are completed; once an ARA is signed and submitted by the PM, that section of the ARA form will become read-only, and any additional edits can be done by having the next user to take action reject the form (Figure 23)
3. **Cancel this ARA (PM-Only right)** – To cancel an ARA in progress (Figure 23)

ARA Backup Detail

15	Anticipated Negotiation Date	07/06/2012

Required Contract Administrator Document(s) 75% / 55% Letter & Binding Documents to Customer (Need)

DOCUMENTS: No documents have been uploaded.

1 **Save** Save form before document upload Submit for Approval after Document Upload

2 **Subject ARA**

Figure 24: Contract Administrator page – Non-Early Start

The CA may take one of the following actions:

1. **Save** – To save an ARA to complete later; the application will call up information entered up to this point when the CA is ready to complete this ARA form (Figure 24)

2. **Reject ARA** – To reject an ARA; a rejected ARA will be returned to the PM’s queue and the action chain starts over, and an email notification will be sent out to all parties that have taken action on this rejected ARA up to this point. (Figure 24)

Once the questions are answered, the CA will need to save this section of the form prior to being given the option to upload documents (Figure 24).

Documentation Upload

Once the CA section of the form is completed, the CA may upload one PDF file to satisfy multiple document upload requirements, or upload multiple PDF files to satisfy one document requirement; by checking off any boxes on the right of the pop-up screen that applies to the document being uploaded (Figure 25).

- Category MOD PENDING (Incremental funding) Documentation -

Upload Up to 10 supporting documents (.pdf format only).

Maximum length of filename is 28 characters. Name will be truncated.

Description:

☐ **75% / 85% Letter & Binding Documents to Customer...**
The 75% (cost reimb), 85% (T&M) letter that was sent to the customer and any supporting documentation that would bind the customer to fund Alion (limitation of funds letter)

☐ **Optional Documentation**
Documents are not required by the ARA system but the user considers them necessary to process the ARA.

Figure 25: Contract Administrator page – Non-Early Start Documentation Upload

Once the contracts documentation(s) upload is satisfied, the CA may take the following actions:

1. **Save** – To save an ARA to complete later; the application will call up information entered up to this point when the CA is ready to complete this ARA form
2. **Upload Documents** – To upload any supporting documents as necessary
3. **Submit for Next Approval** – To submit an ARA once the required input fields are completed; once an ARA is signed and submitted by the CA, that section of the ARA form will become read-only, and any additional edits can be done by having the next user to take action reject the form (Figure 26)
4. **Reject ARA** – To reject an ARA; a rejected ARA will be returned to the PM’s queue and the action chain starts over, and an email notification will be sent out to all parties that have taken action on this rejected ARA up to this point. (Figure 26).

The screenshot shows a web interface for a Contract Administrator. At the top, there is a smaller inset window showing a document upload progress bar. The main window has a header bar with the text "Required Contract Administrator Document(s)" on the left and "75% / 85% Letter & Binding Documents to Customer (Have)" on the right. Below the header, there is a section titled "DOCUMENT LIST (CLICK DOC NAME TO OPEN)". This section contains a single entry: "1. AJERAS_Test.pdf (Size 27,054), Desc: test". Below the entry, it says "Date Uploaded: 07/06/12 03:30 PM, by James Burdette, Job Title: Contract Administrator" and "Attachment Contains: 75% / 85% Letter & Binding Documents to Customer". There is a "Delete" link with a trash icon. At the bottom of the document list, there is a "1" followed by a "SAVE" button (circled in red), an "UPLOAD DOCUMENTS" button, and a "SUBMIT FOR NEXT APPROVAL" button. Below these buttons is a "REJECT ARA" button with a red 'X' icon.

Figure 26: Contract Administrator page – Non-Early Start Documentation After Document Upload

After the CA submits the ARA, the CA section of the ARA form becomes read-only, an email notification will be sent, and this ARA will be in queue for the Controller to take action.

New ARA (Early Start) – Contract Administrator

The application will prompt the Contract Administrator page (Figure 27) in an ARA for which the CA selected to take action on.

REJECT ARA 3

Figure 27: Contract Administrator page – Early Start

The CA may take one of the following actions:

1. **Save** – To save an ARA to complete later; the application will call up information entered up to this point when the CA is ready to complete this ARA form (Figure 27), the CA must save the form prior to allowed to upload document
2. **Upload Documents** – To upload documentation(s) to support an ARA based on Risk Category; documentation upload is not mandatory for Early Start ARAs. Once an ARA is signed and submitted by the CA, that section of the ARA form will become read-only, and any additional edits can be done by having the next user to take action reject the form (Figure 27), or
3. **Reject ARA** – To cancel an ARA; a rejected ARA will be returned to the PM's queue and the action chain starts over, and an email notification will be sent out to all parties that have taken action on this rejected ARA up to this point. (Figure 27)

Documentation Upload

Once the CA section of the form is completed, the CA may upload one PDF file to satisfy multiple document upload requirements, or upload multiple PDF files to satisfy one document requirement; by checking off any boxes on the right of the pop-up screen that applies to the document being uploaded (Figure 28). However, supporting documentation is not required for Early Starts.

- Category PRE-CONTRACT COSTS (Early Start) Documentation

Upload Up to 10 supporting documents (.pdf format only).

Maximum length of filename is 28 characters. Name will be truncated.

Description:

Contracts Documentation:

- ☒ **Other Customer Notification...**
Copy of any other customer notification communication, or supporting documentation that would bind the customer to fund Alion (cost growth or decrease, if applicable)
- ☒ **Supporting Binding documentation...**
Supporting documentation that would bind the customer to fund Alion
- ☒ **Customer Authorization to Proceed...**
Copy of customer communication - authorization for Alion to proceed in accordance with proposal Customer documentation must include wording confirming intent to pay for pre-contract costs.
- ☐ **Optional Documentation**
Documents are not required by the ARA system, but the user considers them necessary to process the ARA.

Figure 28: Contract Administrator page – Early Start Documentation Upload

Once the contracts documentation(s) upload is satisfied, the CA may take the following actions:

1. **Save** – To save an ARA to complete later; the application will call up information entered up to this point when the CA is ready to complete this ARA form
2. **Upload Documents** – To upload any supporting documents as necessary
3. **Submit for Next Approval** – To submit an ARA once the required input fields are completed; once an ARA is signed and submitted by the CA, that section of the ARA form will become read-only, and any additional edits can be done by having the next user to take action reject the form (Figure 29)
4. **Reject ARA** – To reject an ARA; a rejected ARA will be returned to the PM's queue and the action chain starts over, and an email notification will be sent out to all parties that have taken action on this rejected ARA up to this point. (Figure 29).

Figure 29: Contract Administrator page – Early Start Documentation After Document Upload

After the CA submits the ARA, the CA section of the ARA form becomes read-only, an email notification will be sent, and this ARA will be in queue for the Controller to take action.

Negating an ARA

If a contract modification is never received from the customer, the ARA will remain 'Expired' in the ARA module. However, if a contract modification is received after an ARA is exported into JAMIS, the Contract Administrator has the capability to negate the ARA by first going into the 'Archived' menu (Figure 30).

Figure 33: Controller page – Non-Early Start

CLIN Worksheet/Calculator

The Controller may take one of the following actions:

1. **Add** – To add a CLIN to allocate the ARA funding; the system displays and pre-populates the total number of available CLIN(s) under the JAMIS entered (Figure 33)
2. **Reject ARA** – To reject an ARA; a rejected ARA will be returned to the PM's queue and the action chain starts over, and an email notification will be sent out to all parties that have taken action on this rejected ARA up to this point (Figure 33)

Once the CLIN(s) are added, the Controller Summary page will prompt for additional information entry. The Controller will need to complete the company, Interest Impact, Expected Burn Rate, Incurred Costs, and Incurred Fee input fields, and save (Figure 33) the form before the system allows documentation upload; or reject the ARA (Figure 33).

Controller Summary

Interest impact to Alion through receipt of payment	\$ 5000	Expected burn rate per two week period	\$ 500
Incurred Cost not yet Billable	\$ 5000	Incurred Fee not yet Billable	\$ 5000
Total Cost [from CLINs below]	\$ 50,000.00	Total Fees [from CLINs below]	\$ 0.00
		Total	\$ 50,000.00

Required Controller Document(s) ☐ Cost and Fee Determination Documentation (Need) ?

4.	☒	Group Contracts Manager	Parri Engelsen	APPROVE REJECT
5.	☐	Group Controller	Yvonne J Rogers	Pending

Figure 41: Approval Cycle(s)

The Approver may take one of the following actions (Figure 41):

- Review** – The approver is given read-only rights to review an ARA
- Approve** – An approved ARA will be queued in the next approver for action based on the Approval & Threshold Matrix (Figure 7); and an email notification will be sent to all users who have taken action on the ARA of approval, and an email notification will be sent to the next approver to take action
- Reject** – The approver will be allowed to provide a comment and pick a reason code for the rejection, and select an affected tab for focus of review and resubmission. A rejected ARA will be sent back to the PM to correct/resubmit, and the ARA life cycles starts over (Figure 42).

- ARA 00000231-0 Summary Data

Risk Category: MOD PENDING (INCREMENTAL FUNDING), Risk Level: 1	
ARA Org:	Sector: TEOS, Group: DSG, Op: 11A, Division: 0115
Customer	ACE American Insurance Company
Status 1	Submitted to Approval Chain

Glossary

1. **AWARD FEES** are estimated and recorded as a percentage of costs incurred or revenue recognized – by definition not funded until awarded.
2. **MODIFICATION PENDING** applies where the customer needs to increase contract funding, increase contract value, exercise an option period and/or extend the period of performance ONLY for work performed within the scope and statement of work on an existing cost reimbursement or T&M contract. Alion is continuing to provide services at the customer's oral or written request and has submitted a valid notice (i.e., 75% Letter/Limitation of Funds Notice) as well as a modification request to the customer AND the customer has notified Alion a contract modification is in process.

MODIFICATION PENDING SUB-CATEGORIES

- Any pending modification that is solely a request for incremental funding within the existing period of performance and contract ceiling.
 - Any pending modification to exercise an option period and increase funding.
 - Any pending request to increase funding and extend period of performance that is not the exercise of an option period.
3. **CHANGE IN SCOPE** - Work involving a change in scope and/or a change in statement of work for an existing cost reimbursement or T&M contract may include changes in contract value, funding and/or period of performance. A change in scope can be triggered by a customer-issued change order or a written customer authorization for Alion to proceed in accordance Alion's submitted proposal requesting a change in contract scope.
 4. **FIXED PRICE MODIFICATION**, including a request for an equitable adjustment, involves work that gives rise to a request for an increase in the funding and/or value of a fixed price contract. A fixed price modification may include changes to a contract's scope, statement of work, period of performance and/or other terms and conditions.
 5. **COMMERCIAL AT-RISK** is work requested by an existing commercial customer based on prior commercial practice absent an executed T&M or fixed price contract. This includes situations where the customer has paid Alion for amounts billed above contract ceiling.
 6. **INTERNALLY CLEARED** applies where the condition that created the need for risk funding has been cleared or significantly mitigated after the report run date. These items require Alion action but do not require customer involvement or action. Examples include: funding modifications received after the report run date; funding modifications in hand but not recorded in Jamis as of the report run date; Jamis data corrections not recorded as of the report run date that arose from contract modifications already received; and contract cost corrections in process as of the report run date. These conditions are normally resolved within the next cost accounting period, usually 30 days, but not later than the end of the subsequent quarter.
 7. **PRE-CONTRACT COSTS** involve work in advance of a final negotiated contract subject to notice of award where the customer has authorized Alion in writing to proceed in advance of issuing a definitized contract.
